DEPARTMENT OF STATISTICS
SARDAR PATEL UNIVERSITY
Robust Kit of Solutions

Our Vision
Establish an internationally accredited and globally respected centre for Statistical Science and Quality Management that contributes to the societal enrichment by developing ethical, dependable and socially sensitive Statisticians and Quality Managers committed to excellence.

Our Mission
- Attain academic excellence by updating and expanding horizon of knowledge through teaching, research and extension activities.
- Bring theory into practice through corporate linkage for consultancy.
- Provide value augmented quality education through innovations.
Message from the Vice-Chancellor

The University is always concentrating on improving the academic standards and introducing new need-based courses and thus involving in fruitful interaction with the society. Not with standing with these we are now marching towards establishing our interaction with the corporate world in a big way. University has already established “Department of Statistics: Consultancy Activity Cell” as a part of “University and Industry Interaction Cell”. Through this cell the Department of Statistics is carrying out consultancy activities with industries and research organizations. The Department has set an objective to revise/change the courses and syllabi, from time to time, to meet the statistical and computational needs of corporate world. The M.Sc Programme offered by the Department of Statistics is with this purpose. It seeks to shape, nurture, and develop potential statisticians with well-equipped statistical and computational skills. Moreover, they are also trained in hardworking, pro-active behaviour and positive thinking and action.

I expect from all our students to devote their time and energy to create awareness in the society at large about valuable work being done in our University.

I am glad to know that last two years students were recruited in different establishments giving good response to the placement brochure. I am confident that with continued support of various Industries and Institutes the Department will achieve greater heights in its pursuit of excellence. I wish all the students of this batch every success in their lives. I am sure they are well equipped to face the challenges that lie ahead in their lives in general and in the statistical consultancy activities, in particular.

Vallabh Vidyanagar

March 20, 2010

Bharatbhai G. Patel

Vice Chancellor
Message from Head’s Desk.....

Dr. Ashok Shanubhogue  
Professor and Head 
Department of Statistics  
Sardar Patel University 
Valabhidyanagar- 388120  
Email : a_shanubhogue@yahoo.com  
(M) 09879535433  
(O) 02692- 226871, 226881

It gives me immense pleasure to release the students’ placement brochure for the Batch 2009-10. At the outset let me express my gratitude and heartfelt thanks to all those who responded positively for our placement brochures’, since 2004, and showed faith and confidence in our students, by providing suitable recruitments.

I am happy to state that our M.Sc. programme is finding necessary changes and improvements by considering the suggestions that we received from the experts in corporate sector and in academics from time to time.

In today’s fast computational environment, training the statisticians in computational as well as statistical skills is a challenging task. Moreover, providing expertise in using simultaneously several statistical techniques based on complex data sets to meet a set of objectives effectively is an exigent job. The rapidly progressing globalization, fast pace of technological changes and competitive corporate world has made corporate bodies to acquire world reputed quality standards certificates. This has resulted in increased use of statistics at every sphere of corporate activities. We hope that our trained statisticians will be able to meet such demands of the Industry and thus encouraging us to progress by incorporating necessary changes in our academic activities as and when we receive feedbacks.

I am confident that our young boys and girls who have track record of accomplishment and demonstrated potential will make useful contributions to whichever organizations they join.

I do look forward to your favorable response by way of recruiting our students and for forging a mutually beneficial relationship with your organization.

Vallabhidyanagar  
March 20, 2010  
Ashok Shanubhogue  
Professor and Head
Brief Outline of Department of Statistics……

The Department of Statistics was established in the year 1961. Since its establishment the department made its name as one of the best teaching and research department in the western region. At present the department is having seven faculty members actively engaged in teaching and research.

About M.Sc. Programme:

The M.Sc course of the department is a four-semester programme spread over two years. In the programme the students study 18 subjects along with practicals and a project. The curriculum and course work of the M.Sc Programme have been carefully designed by taking into account the UGC recommendations, availability of the staff with relevant specializations and need of government and the corporate sectors in and around the township. Students are offered two specializations : (i) Biostatistics and (ii) Financial Statistics. Along with the M.Sc programme students are also allowed to take certificate courses in (i) SPSS (ii) Biostatistics and (iii) Financial Statistics. The objective of these add-on courses is to provide opportunity to the students to enhance their knowledge base to meet any statistical need of the employer.

The teaching method comprises of lectures, case studies, presentations, seminars, quizzes, programming, software handling, and consultancy training and practical. The emphasis of the teaching is on both learning the fundamentals and application of the techniques, by suitably selecting from the statistical tool kit, for the data obtained through statistical consultancy activities.

The students’ also carry out project work as a part of their study. In the project student usually take up the problems assigned by the projects guides. At the end of the work they submit a detailed report of the project for which they are evaluated for 100 marks. The emphasis on the project is giving training from the collection of the data till the preparation of the final report.

Some Details about the Department of Statistics:

**Teaching Faculty:** Renowned faculties in their discipline and associated with consultancy activity.

**Departmental Facilities:** Classrooms with Multimedia Projectors, Air-conditioned Laboratory with 50 advanced computers and Multimedia Projector. Departmental Library with sufficient amount of research journals and books. Seminar Hall with Multimedia Projector. Students’ consultancy activities and Field projects.

**Department Placement Cell:** Dedicated department committee on placement activities.

In P.G. Programme about 124 students are studying in the Department. There are 2 M.Phil students and 10 Ph.D. students studying for their research degree. Further about 50 students are studying for various Certificate Courses.

Annual Day Photo Session (Faculties and Students)....
### About Facilities at Department of Statistics

#### Class Room
- Class rooms with multimedia projector to enhance e-learning.
- Audio and Video resources in the form of cassettes and CDs encompass major areas on management and computer which make learning enjoyable.

#### Department Library
- Provides academic support, and houses around 8 Indian Journals, 24 International Research journals and full excess of E-Journals (From UGC-INFLIBNET).
- Collections of about 500 books in Department library on various subjects of Statistics.

#### Computer Laboratory
- Capacity 50 students
- Provides in true sense gateway to the world of applications and information resources.
- The whole laboratory is equipped with 100 Mbps switched network.
- The latest computers on LAN 1:1 computer-student ratio enhance the value of the Laboratory.
- Entire network is connected with Server to provide centralize data excess.
- The entire network is connected to UPS facility with 3 hrs battery backup.
Training Received Through M.Sc Programme.

The students of M.Sc programme are given rigorous training both in theoretical developments and applied statistics. They study most of the applied or application oriented subjects like Stochastic Process, Multivariate Analysis, Sampling, Design of Experiments, Linear Models, Reliability and life testing, Statistical Quality Control, Linear Programming and Econometrics. This year we have opened up a Statistical Consultancy Cell. The cell approaches the prospective customers and, through its wide publicity, it gets work related to statistical analysis. These works are assigned to interested students with a teacher-in-charge for necessary guidance. Thus, students get on hand training of data analysis. Apart from this, we have made project work as compulsory in M. Sc. final.
