Sardar Patel University
Vallabh Vidyanagar- 388 120
About the MQPM Programme

The Department of Statistics through its post-graduate programme in Quality and Productivity Management provides adequate training to graduate students to become skilled personnel in the areas of Quality and Productivity. The MQPM programme of the department is a four-semester programme spread over two years. The key strength of this programme lies in its inter-disciplinary nature. MQPM is a blend of Statistical Science, Management Science and Computer Science. The fourth semester is a dedicated full time project work where in students lay their hands on the application of what they have learnt in the three semesters. This enables them to get absorbed in the industry easily and immediately after finishing the programme. Further, to give its students a flavor of the contemporary educational advancement, the Department also co-ordinates various training programmes at its campus by tying up with professional bodies from the corporate world. Finally, the Department puts concrete efforts to not only educate and train the students but also provide a strong backup for their project as well as job placement.

About Sardar Patel University

The University was established on 31st October 1955, the Jayanti Day, and a new star, named after the Iron man of India, was born on the academic horizon of the country. Sardar Patel University has always concentrated on improving the academic standards and introducing new need based courses and thus involving in fruitful interaction with the society. Not withstanding with these, university is now marching towards establishing interaction with the corporate world in a big way. It is situated in Vallabhbh Vidyanagar — a town 5 kms away from Anand station.

About the Seminar

This seminar is aimed at creating awareness among the final year students of B Sc./ B.E./ B. Com/ B.B.A and others about career opportunities in the field of Quality and Productivity Management.

Speakers from private and public sector (Industries, Corporates and Government) will put the role of Quality and Productivity Management in picture and present and discuss about the posts that can be bagged with knowledge of these areas as well as how studies in these areas can be useful for making career in top organizations.

The department hopes to provide a new direction to a fraction of the young mass of Gujarat, what it has experienced in the last five years. In the last five years demand for Quality and Productivity professionals has aroused dramatically in manufacturing sectors as well as service sectors such as market research, banks, BPOs, Insurance, etc. for developing quality policies and plans and for solving various quality and productivity related issues which have become the prime concern in today’s competitive world. The growth graph of the MQPM programme is ever rising since its inception and we invite you to join hands with us for a mutually beneficial relationship.
