(2019). “**Breakeven Analysis in Dairy Farm Enterprises and Strategies for its Sustainable Growth under National Dairy Plan-I: Punjab State**”, AERC Report No. 189, Agro-Economic Research Centre, Sardar Patel University, Vallabh Vidyanagar, Anand, Gujarat.

Foreword

Dairying has become an important secondary source of income for millions of poor and rural households and has assumed an important role in providing employment and income generating opportunities particularly for marginal and women farmers. This sector has created a significant impact on equity in terms of employment and poverty alleviation as well. It cannot be merely a co-incidence that the level of rural poverty is significantly higher in states where livestock sector is underdeveloped. This is the sector where the poor contribute to growth directly instead of deriving benefits from growth generated in other sectors of the economy. Milk has always played a critical role in addressing hunger and malnutrition.

Cost plays an important role in portraying economic viability of a dairy enterprise. It is a critical economic indicator for milk producers, consumers and policy makers in order to provide an effective linkage between the milk producers and consumers for fixing the price of milk rationally. Generally, a milk producer can increase his dairy income in two ways either by increasing the milk production or by reducing cost of milk production. Cost of milk production often becomes a policy issue, when milk producers complain that the price of milk they are getting does not cover cost of milk production. One of the main problems identified is many dairy producers, especially small operations, are unaware of their costs of production and financial breakeven point. During these tough times, it is important for producers to see how they can reduce costs without reducing milk production. Therefore there is a need to know the break-even point to estimate the minimum quantity of milk to be produced to cover the total cost on all the size groups of household for both the cow and buffaloes. Breakeven point is a point where no profit no loss status achieved. The costs that have to be covered by the milk price determine the break-even point, or price. Keeping the above background in mind, it was felt necessary to study the comparative analysis of per liter cost of milk production as well as break even analysis of both group of member and non members of dairy cooperative society for two categories (small and medium) in case of milch Cow and buffalo. In view of above, as desired by the NDDDB, Anand, the present study was undertaken to know the break-even point to estimate the minimum quantity of milk to be produced to cover the total cost of milk production for both the cows and buffaloes. The study came out with important and relevant policy implications which would help to enhance efficiency of implementation benefitting the milk producers.

I am thankful to authors and their research team for putting in a lot of efforts to complete this excellent piece of work. I also thank the National Dairy Development Board, Anand for giving us an opportunity to undertake this study. I hope this report will be useful for policy makers and researchers.

Acknowledgements

The study on “**Breakeven Analysis in Dairy Farm Enterprises and Strategies for its Sustainable Growth under National Dairy Plan-I**” has been carried out at the Agro-Economic Research Centre, Sardar Patel University, Vallabh Vidyanagar, Anand, Gujarat, as supported by National Dairy Development Board, Anand, Gujarat.

We have benefited immensely from various scholars and officials from different government departments while carrying out this study. At the outset, we would like to thank **Prof. Shirish Kulkarni, Vice Chancellor of our University** and Chairman, AERC Advisory Body for his constant encouragement and support for undertaking such research activity at the Centre.

We are deeply grateful to our former Honorary Advisor Prof. **Mahesh Pathak** for his constant support and guidance in undertaking and completion of this project work.

We are grateful to **Dr. Dilip Rath**, Chairman, National Dairy Development Board (NDDB), Anand for giving us an opportunity to undertake this study. We also thank the officers of NDDB, Shri Meenesh C Shah (Executive Director-I), Shri O. P. Sachan (General Manager, Purchase), Shri S. Regupathai (General Manager, Accounts), Dr. G. Chokkalingam (General Manager, Sectoral Analysis & Studies), Shri V. Sridhar (General Manager, Animal Nutrition), Shri Subir Mitra (Deputy General Manager, Sectoral Analysis & Studies), Dr. Jignesh Shah (Sr. Manager, Sectoral Analysis & Studies), Shri A. K. Srivastava, Team Leader (Animal Nutrition), Shri S. Y. Krishna (Sr. Manager, Purchase), Shri Arvind Kumar (Sr. Manager, Coordination and Monitoring Cell), Dr. Nihar Ghosh (Sr. Manager, Animal Nutrition), Shri Mayank Tandon (Manager, Animal Nutrition), and Shri Himanshu Ratnottar (Manager, Purchase) for their support and help during the study.

We are specifically thankful to Shri V. Sridhar (GM, AN) and Shri A. K. Srivastava (Team Leader, Animal Nutrition), Dr. Nihar Ghosh (Sr. Manager, Animal Nutrition), Shri Mayank Tandon (Manager, Animal Nutrition), NDDB, Anand for their constant support during the execution of field survey data as well as data analysis and presentation.

We thank all the corresponding officers of NDDB in selected four States for providing the necessary support in primary data collection. We are grateful to all the Chairman and Managing Director of selected District Co-operative Milk Producers' Union Ltd as well as Primary Dairy Cooperative Societies of selected villages from all the States covered under study for providing the necessary data and support in primary data collection.

We are also thankful to all our state partners, viz. Centre for Ecological Economics and Natural Resources (CEENR), Institute for Social and Economic Change, Bangalore, India; Director, Agro-Economic Research Centre, T M Bhagalpur University, Bhagalpur, Bihar; Principal Scientist and Head, Division of Dairy Economics, Statistics & Management, National Dairy Research Institute, Karnal (Haryana) for their support in primary data collection in respective state.

The study would not have reached to this stage without the active co-operation of the respondent dairy households from selected villages who provided all the required data for the study without any hesitation and expectation. We thank each one of them for their invaluable support.

We have also received support and encouragement from our colleagues in the Centre while carrying out the study. We are thankful to our fieldsmen (for collecting data from the field and government/dairy union offices), accounts and supporting staff for necessary support.

Thanks to Shri Deep Patel (Research and Reference Assistant-Lib) for preparing the cover page of report and making necessary arrangements for printing of the report.

Lastly but not least, we thank the all other AERC and CCS staff for their direct and indirect support.

Chapter I Introduction	01
1.1 Introduction	
1.2 Need of the Study	
1.3 Objectives of the study	
1.4 Data Sources	
1.5 Survey Design	
1.5.1 Sampling Framework	
1.5.2 Development of Survey schedule	
1.6 Data Analysis	
1.6.1 Operational Expenses/ Variable/Paid out /Direct Cost	
1.6.2 Fixed Cost	
1.6.3 Estimation of Opportunity Cost:	
1.6.4 Estimation of Association between income received from Dairy and Gross Income	
1.6.5 Estimation of Weighted Average	
1.6.6 Standard Error of the Mean	
1.6.7 Estimation of Break Even Point	
1.6.8 Sensitivity Analysis	
1.6.9 Constraints Analysis	
1.7 Organization of Report	
Chapter II Profile of Selected Households	15
2.1 Introduction	
2.2 Profile of Selected DCS and NDCS Households	
2.3 Herd Strength	
2.4 Source-wise Farmers' Income	
2.5 Fodder Crop Production by Dairy Farmers	
2.6 Chapter Summary	

Chapter III	Cost of Milk Production & Sensitivity Analysis	25
	3.1 Introduction	
	3.2 Details of Milch Animals	
	3.3 Cost of Feed and Fodder	
	3.4 Labour Use and Other Expenditure	
	3.5 Sale of Milk and Other Income	
	3.6 Cost of Milk Production	
	3.7 Sensitivity Analysis	
	3.8 Chapter Summary	
Chapter IV	Breakeven Analysis	39
	4.1 Introduction	
	4.2 Breakeven Levels	
	4.3 Sensitivity Analysis	
	4.3 Chapter Summary	
Chapter V	Constraints in Milk Production and Feeding Management	47
	5.1 Introduction	
	5.2 Constraints in Milk Production	
	5.3 Constraints in Feeding Management	
	5.4 Service Delivery System	
	5.5 Chapter Summary	
Chapter VI	Summary and Conclusions	53
	6.1 Introduction	
	6.2 Major Findings	
	6.3 Policy Implications	
	References	60
	Annexures (I-V)	61

List of Tables

Table No.	Title	Page
1.1	Selected States and Milk Unions for the Study	4
1.2	Details on Selected Milk Producers' Cooperative Unions in Selected States of India	5
1.3	Sampling Framework of the Study	7
2.1	Family Profile of Selected Households	16
2.2	Socio-Economic Characteristics of Selected Households	17
2.3	Details on Occupation and Land Holdings Size of Selected Households	18
2.4	Herd Strength of Selected Households (Animals/hh)	19
2.5	Details on Cattle Shed of Selected dairy Households	20
2.6	Fodder Storage with Selected dairy Households	20
2.7	Holding of Productive Assets by Selected dairy Households	21
2.8	Purchase of Animal during 2018-19 by selected Households	22
2.9	Source-wise Farmer's Households Gross Income (2018-19)	22
2.10	Correlation of Dairy Income and Total Income	23
2.11	Details on Fodder Crops Grown by the Selected DCS Households	23
2.12	Details on Fodder Crops Grown by the Selected NDCS Households	24
2.13	Season-wise Milk Yield and Milk rate realised by Selected Households	24
3.1	Details of Milch Animals (Dry + In Milk) on Survey Date	27
3.2	Details of Total Cost of Feed and Fodder- DCS- Summer season	28
3.3	Details of Total Cost of Feed and Fodder- NDCS- Summer season	29
3.4	Fodder Consumption as per Rainy Seasons (kg / day) - DCS Households-Rainy	29
3.5	Fodder Consumption as per Rainy Seasons (kg / day) - NDCS Households-Rainy	30
3.6	Fodder Consumption as per Winter Seasons (kg / day) - DCS Households-Rainy	30
3.7	Fodder Consumption as per Winter Seasons (kg / day) - NDCS Households-Rainy	30
3.8	Labour use for dairy activities by Selected Households	31
3.9	Other Expenditures incurred by Selected Households	32

3.10	Details on Sale of Milk by selected households	32
3.11	Details of Other Income in Dairy (Annual) by selected Households	33
3.12	Cost of Milk Production (per day per animal) in DCS households	34
3.13	Cost of Milk Production (per day per animal) in NDCS households	34
3.14	Sensitivity Analysis for Changes in Fodder Cost (reduction by 5%) and Milk Yield (increase by 5%) in DCS hh	35
3.15	Sensitivity Analysis for Changes in Fodder Cost (reduction by 15% in Bihar and Punjab & 13% in Gujarat and Karnataka) and Milk Yield (increase by 5%) in DCS hh	35
3.16	Sensitivity Analysis for Changes in Milk Yield (increase by 15%) in DCS hh	36
3.17	Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 5%) and Milk Yield (increase by 20%) in DCS hh	36
3.18	Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh	37
3.19	Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh with increase in milk days	37
3.20	Sensitivity Analysis Fixed Milk Rate across the States	37
4.1	BEP of Milk Production of in milk animal/lactation of DCS households	39
4.2	BEP of Milk Production of in milk animal/lactation of NDCS households	40
4.3	BEP of Milk Production of in milk animal/lactation of DCS households- paid out cost	40
4.4	BEP of Milk Production of in milk animal/lactation of NDCS households- paid out cost	40
4.5	BEP of Milk Production of Milch animal/Cycle of DCS households	41
4.6	BEP of Milk Production of Milch animal/Cycle of NDCS households	41
4.7	BEP of Milk Production of Milch animal/Cycle of DCS households- Paid out Cost	41
4.8	BEP of Milk Production of Milch animal/Cycle of NDCS households- Paid out Cost	42
4.9	BEP of Milk Production of milch animal/Lactation of DCS households-without Family labour	42
4.10	BEP of Milk Production of milch animal/Cycle of DCS households- without Family labour	42

4.11	BEP-Sensitivity Analysis for Changes in Fodder Cost (reduction by 5%) and Milk Yield (increase by 5%) in DCS hh (Lactation)	43
4.12	BEP-Sensitivity Analysis for Changes in Fodder Cost (reduction by 5%) and Milk Yield (increase by 5%) in DCS hh (Cycle)	43
4.13	BEP-Sensitivity Analysis for Changes in Fodder Cost (reduction by 15% in Bihar and Punjab & 13% in Gujarat and Karnataka) and Milk Yield (increase by 5%) in DCS hh (Lactation)	43
4.14	BEP-Sensitivity Analysis for Changes in Fodder Cost (reduction by 15% in Bihar and Punjab & 13% in Gujarat and Karnataka) and Milk Yield (increase by 5%) in DCS hh (Cycle)	44
4.15	BEP-Sensitivity Analysis for Changes in Milk Yield (increase by 15%) in DCS hh (lactation)	44
4.16	BEP-Sensitivity Analysis for Changes in Milk Yield (increase by 15%) in DCS hh (Cycle)	44
4.17	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 5%) and Milk Yield (increase by 20%) in DCS hh (Lactation)	45
4.18	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 5%) and Milk Yield (increase by 20%) in DCS hh (Cycle)	45
4.19	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh (Lactation)	45
4.20	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh (Cycle)	46
4.21	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh with increase in milk days (lactation)	46
4.22	BEP-Sensitivity Analysis for Changes in Fodder Cost (Increase in fodder cost by 15%) and Milk Yield (increase by 25%) in DCS hh with increase in milk days (cycle)	46
5.1	Constraints Faced in Milk Production - DCS Households	47
5.2	Constraints Faced in Milk Production - NDCS Households	48
5.3	Constraints Faced in Feeding Management - DCS Households	49
5.4	Constraints Faced in Feeding Management - NDCS Households	50
5.5	Details of Input Service Delivery experienced by selected households	52
5.6	Details of Output Service Delivery experienced by selected households	52
