**"The great ideal of geographical and economic unification of India, an ideal which for centuries remained a distant dream and which appeared as remote and as difficult of attainment even after the advent of Indian independence was consummated by the policy of integration..."**

**- Sardar Vallabhbhai Patel  
in his address to the Constituent Assembly on 12 October 1949**

"One of the greatest problems which India faces today is to rehabilitate its rural areas. It is largely from that point of view that we have set ourselves to the task of achieving a rural University (in Vallabh Vidyanagar) with a rural bias based on the principles of co-operation, self-help and self-sufficiency. The task is one before which much stouter hearts may quail, but thanks to the public spirit shown by the selfless band of workers, we are gradually progressing towards achieving success in this great experiment... *Gujarat has the unique distinction of having attempted to work Gandhiji's constructive ideas in a manner in which no other part of India has done. It is, therefore, fitting that these ideals should have found their exponents and enthusiasts there, who have turned a land infested by dacoits and robbers into a seat of a great experiment (which is Vallabh Vidyanagar today).*"

## **Foreword**

***“Manpower without unity is not a strength unless it is harmonized and united properly, then it becomes a spiritual strength”***

**-Sardar Vallabhbhai Patel**

The year 2022-23 was full of events for Sardar Patel University. As it was mentioned in the previous Annual Report, the university acquired ‘A’ grade with CGPA 3.11 by National Assessment and Accreditation Council (NAAC) in the fourth cycle. It is a pleasure to put on record that this is consecutively second time that the university is accredited by ‘A’ grade. It is needless to say that it is an outcome of our harmonious unity of the faculty members and administrative staff of the university. The university participates in other academic rankings like GSIRF, NIRF, QS World ranking etc. Individual departments and faculty also get recognitions for their academic performances.

The university is committed to provide quality education and thereby making the dream of ‘*Viksit Bharat*’ a reality. The university has started implementing NEP-2020 by revising syllabi in tandem with NCERT. Also to enhance the efforts to provide the students more insight into Indian Knowledge Systems (IKS), the university has established ‘*Maharshi Vedvyas IKS Centre*’. Under this centre the university has provided grants for research in various areas of IKS. These grants will work as seed money accordingly, major research projects from National funding agencies are expected. Also, many courses based on IKS are designed by this centre.

To strengthen the research ecosystem, the university has sanctioned seed money projects to young faculty members, in turn they will apply for major research projects to funding agencies. The library and laboratory facilities are enhanced to have better research infrastructure. We have revised various policies to promote research and innovations. The staff is encouraged to carry out consultancy projects, the revenue thus generated is shared to the teaching and administrative staff involved.

The university is continuously giving promotions to eligible teachers through Career Advance Scheme. Also, the university uses its own resources to fill the gap due to vacant teaching and administrative positions. Adequate welfare measures are taken for the staff.

The university has instituted a monthly lecture series named, ‘*Padma Shree Vyakhyan Shreni*’, where a *Padma Shree* personality is invited to give a lecture. This activity is aimed at motivating students and faculty in working in various facets of life and academia.

The university is also involved in doing activities in tune with National Programmes as well as to help the society in better living. Since last two years the university organizes ‘Millet Festival’ to enhance awareness of millet foods in the society. The university has started organizing ‘*Prakritik Khedut Haat*’ where farmers from the

vicinity sell organic agricultural products. While this report is in preparation our Health Centre has organized a camp for tests for Cervical Cancer and Pep-Smear for women.

In summary, the university is performing well in all three aspects mandated to it namely, Teaching, Research and Extension. This report presents elaborative picture of activities of the university. The team of teachers and administrative staff involved in the preparation of this Annual Report have done an excellent job, they deserve big Congratulations.

## CHAPTER-2

### TEACHING-LEARNING AND EVALUATION

---

Teaching-Learning is a core ingredient in the constitution of any University. It is the methodology of implementation that differentiates the university from others. The university has been keeping in its nucleolus, what the Iron Man of India envisioned about the education in Independent India. Keeping the character building and spreading education in the rural sector of India is central to Sardar Patel University. University is following his words literally, *शील वृत्त फलम् श्रुतम्* “Education without character is of no value. We must be intent on producing citizens of Independent India and not helpless people loitering for jobs.” This was enlarged later on into emphasis on excellence: “Excellence Matters”, the slogan we implemented in our practice during the celebration of our platinum jubilee year of our existence as a state university.

Teaching and learning should ideally lead to change in behaviour patterns and behaviour potential, for this is vital in shaping attitudes, knowledge, understanding, and appreciation. Our mission as a university has been ‘to accelerate the process of regeneration of villages by the application of modern arts, sciences and technology to rural requirements’. This requires constant self-assessment and constant assessment and reassessment of future needs which alone would help us achieve the target of creating future citizens of this country who would not only be self-reliant but would also have the ability to be self-employed. The region of Gujarat we serve, Charotar, is known for entrepreneurs and philanthropists. We, Charotar, are business-oriented and prefer to be self-employed and create employment for others rather than be employed by others. Our special *rurban* (a recent coinage) reflecting partly-rural-partly-urban setting has allowed us to retain the uniqueness of guru-shishya parampara even if it may be in the absence of its ashram-type style of existence in that tradition.

We take legitimate pride in the fact that we have a robust system of teaching-learning which involves lecture, lecture-cum-workshop, lecture-demonstration, course-specific classroom seminars, tutorials, quizzes etc as a part of our strategy. We have also evolved a transparent and accountable system of evaluation involving blind assessment using non-transparent flapping of their seat numbers by the examinees at the end of an examination; secure centralised process of evaluation and compilation of results; speedy and confidential reassessment by external examiners outside this university; stricter penalties for unethical methods used by the students or evaluators after a free and fair hearing by the Unfair Means Committee appointed by the University Syndicate; on-the-spot verification of marked answerscripts by any student harbouring doubts about the outcome of evaluation; creation of grievance redressal committee etc voluntarily and as mandated by the UGC or the Education Department of the Government of Gujarat. All this has led to stress-free examinations and timely declaration of results. From academic year: 2018-19 Sardar Patel University has started on demand examination in which student who fails in any subject can Demand for examination and appear in examination. With on Demand examination student can complete their course of study with the stipulated time.

## 2.1 NUMBER OF ACADEMIC DAYS IN THE YEAR 2022-2023

### Number of Days Devoted to Teaching, Admission, and Examinations at Undergraduate and Postgraduate Level 2022-2023

Level	(6 days a week pattern) Teaching and Learning process (week)	Admission/Examinations Preperation (week)
Postgraduate	30	12
Under graduate	30	10

The Academic calendar of colleges and University Departments in various faculties is prepared and announced well in advance. Alternative teaching arrangements are always made of the teachers, if a teacher is absent. Teachers mark the presence of the students in each lecture everyday. Normally every teacher is available in the department at least for six hours a day, irrespective of his/her lecture schedule on that given day. In fact, some of the science departments and management department function from 9:00 am to late in the evening and even on holidays. This increases the availability of teachers for students' counselling.

## 2.2 ADMISSION

The admission process for the Post-Graduate and Under Graduate courses is centralized and online. The students have to fill the admission form online. The prospectus is available online to the students. The prospectus is designed to introduce the creairvity, highlights the details of the admission process to guide the students in choosing the right academic programs.

The University issues an official notification for admission in mid-may every year & gets it published in the news papers with large circulation.

The students are asked to fill the forms online. After the deadline to fill the form is over, the forms are checked and merit list prepared & displayed on the University website. (spuvvn.edu.) The counseling datesand time are also announced on the wesite for different departments. The admission process is executed as per the schedule in a transparent way.

Each of the Departments in the University has an admission committee, usually with the Head as the convener, entrusted with the task of finalizing admissions. The committee has the brief of ensuring that admissions are granted strictly on the basis of merit. However, when there is provision of an entrance test for admission to a particular programme, a new merit list, which has a judicious mix of the initial merit and merit based on the results of the entrance test (intimated before hand in the Prospectus), is used for granting admissions. This way, we admit applicants in the order of merit against open seats, reserved seats for SC (7%), ST (15%), SEBC (27%), Physically/Visually handicapped (3%), EWS (10%) etc, and seats for students from other universities in Gujarat (10%) and the other states in the Union of India (20% seats set aside for them in Departments in the University recognized by the UGC under its Special Assistance Programme (SAP) because this is mandatory under the UGC provisions). The process is usually completed in a day or two at the most.

We use the e-mail, the Internet, bulk sms services and the telephone as tools to communicate effectively and efficiently within a short span of time. The academic calendars are ready by the time the admissions are over, and these are then displayed on the notice board in the Department concerned, which is how we are able to begin teaching immediately thereafter.

### 2.3 International Students

The International Students Centre (ISC) was established in Sardar Patel University in June 2004. The objectives behind its establishment are: (a) to assist the International Student Community by providing information related to various courses on offer in any given year, the procedure of admission to these courses, criteria governing eligibility, the fee to be paid etc, and (b) to facilitate the applicants in getting admission, help them settle down quickly and happily, take active interest in their studies, and take care of their welfare, including their security clearance from the local police, and so on. This centre also provides a link between International students and Institutes of their studies.

International Students Centre has been fortunate enough to attract a lot of foreign students every year, thanks to our need-based innovative courses on offer year after year. Our ISC has been singularly responsible for coordinating all the activities related to the admission of international scholars through a Single Window System ever since its inception. It coordinates with Indian Council for Cultural Relations (ICCR), Ministries of Human Resource Development (MHRD), External Affairs (MEA), and Home Affairs (MHA), as well as with different Embassies and Consulates for various purposes including assisting them in obtaining student or research Visa, Scholarships etc.

International Students Centre accommodates most of International Students in the University Staff Colony, Vallabh Vidyanagar to ensure their safety and give them peaceful atmosphere.

Dr. A. H. Hasmani, Professor and Head, Department of Mathematics has been the Honorary Director, ISC since 01 September 2017. From July 1st, 2023 Dr. Yogesh C. Joshi, Former Dean and Professor, P. G. Department of Business Management is Honorary Director, while Dr. R.R. Panchal is Honorary Deputy Director, ISC.

## 2.6 Teaching-Learning Avenues

Besides formal lectures and experiments in the laboratories, teachers use an array of other methods of teaching-learning such as lecture-cum-workshop, guest lectures by experts, projects, case studies, and summer training, supported by computer and Internet facilities, and special efforts made to prepare the learners to take NET-JRF, participation in research seminars in the department concerned. The following are the details:

### (1) Seminars/Guest Lectures/Conferences

There is a provision for obligatory Students Seminars in each subject in Basic Sciences in each semester. Thus in every semester, every student has to present one seminar in each paper. Besides these there are weekly departmental researches seminars conducted during the year in the Departments like Department of Mathematics, Department of Physics, Department of Psychology. Some laboratories in the Department of Biosciences which are accessible to PhD, MPhil, MSc students. The research conferences and other guest lectures are organized during the year.

### (2) Projects and Summer Trainings

(a) There is a provision for mandatory research projects in the last semester in the Departments of Biosciences, Home Science, Statistics, and Msc in Quality and Productivity and in Computer Science. In the Department of Business Management, students have to prepare a term paper.

(b) There is a provision for optional research projects in Department of Physics and Department of Mathematics.

(c) In the Department of Social Work there is a provision for mandatory field trip.

(d) Research Training Programme organized by Department of Psychology Sponsored by ICSSR.

#### **(4) Computer Training / Internet Connectivity**

The University Computer Centre, which manages all the Internet connections in the University. All the University Departments have Internet connectivity, which is how it could be made easily accessible to the PG MPhil and PhD students in the Department concerned. The University Library provides access to online journals through INFLIBNET. It also hosts University Cyber Café.

#### **(5) Special Efforts for NET-JRF/GATE**

Special efforts are being made in several Departments of the University for training meritorious students and those from SC, ST, and Minority categories for Competitive Exams at the national level like GSLET/NET-JRF/GATE. One day workshops for training for NET-JRF/GATE were organized in every science department as well as the Department of Business Studies.

#### **(6) Departmental Libraries**

The University has promoted the concept of Departmental Libraries and offers full support in the establishment and enrichment of these in each of the Postgraduate Departments, the details of which have been made available elsewhere in this Report. The Departmental Libraries supplement the Bhaikaka Library, which is the Central Library of the University. The Department of Mathematics

has the Western Region Library supported by the National Board for Higher Mathematics, Department of Atomic Energy, Government of India. This is one of the 11 such Regional Libraries in Mathematics across India.

### 2.7 Evaluation

The Examination Section, in consultation with the University Departments and Colleges draws up an annual plan for holding semester/Internal & end of Semestr (Annual) examinations at the beginning of any academic year, and follows this plan meticulously. The results are announced well in time.

Each of the Papers has a total weighting of 100 marks with 70% set aside for University examinations and 30% for continuous internal assessment consisting of tests, seminars and quizzes. Thus, the examinations in the University comprise of two components: external and internal evaluation. With the introduction of CBCS the University also revised the question paper style. This now comprises of an objective component and a well-balanced unitwise 25% waitage of questions to facilitate the students preparing for examination a question bank for each paper is

prepared circulated among the students. The questions set usually require a reasonable amount of knowledge and skills pertaining to a course in a given unit from a student. We have a transparent system of allowing the students to see their marked scripts after every internal test and the examiner concerned takes time to discuss with his/her students the nitty-gritty of evaluation. The provision of blind assessment (the scripts are flapped!), and blind reassessment by teachers outside the university for students on the PG courses, and the teachers of the Postgraduate Department concerned in the University for the undergraduate examinations are made. What is more, there is moderation of assessment at undergraduate level examinations.

**2.9 Examination Reforms Unit**

The Examination Reforms Unit was established in 1976 in Sardar Patel University and received grants from the UGC until March 1995. It was only then that the State Government began to shoulder the financial burden.

Examination Reforms Unit of the University has a very long history of about 41 years, during which its dynamic conveners along with efficient teams have plunged headlong into implementation of various programmes of examination reforms formulated by the UGC.

## CHAPTER-3

### RESEARCH, CONSULTANCY AND EXTENSION SERVICES

#### 3.1 Research

Teaching-learning goes simultaneously with research and the approach based on the three must lead to further research & development and also patentable work. The university has built a track-record in attracting research funding from the UGC and funding agencies like DST, DBT, DRDO, ICSSR etc at the national level and also from the agencies of the Government of Gujarat. Today we have 03 University Departments recognized by the UGC under CAS scheme and 07 Departments under SAP-DRS scheme. Our teachers apply and get funding for Major and Minor Research Projects.

### Consultancy Services

Our Science Departments, Commerce and Management Departments provide consultancy services both paid as well as on honorary and informal basis. The departments within the Humanities and the Social Sciences offer consultations sometimes to the State and national level agencies also on honorary and informal basis. The University and Industry Interaction (U & I Interaction) Cell, established in 2005 to facilitate such consultancy services, often helps to generate revenue largely for the teachers offering consultancy services to the industry with a percentage of it contributed to the university.

The individual departments also offer analytical services to the other academic institutions and industry on chargeable basis and the fund generated is pooled and spent on the materilance of equipments.

### Extension Services

These are not extension services, please include social and public services, for example activities done for adopted villages etc.

We have made available, the details of both consultancy and extension services provided by the university teachers in this report.

#### (4) Ph.D. Programme

University Postgraduate Departments have a strong and vibrant Ph.D. Programme. This programme is integral to our research efforts. The Ph.D. Programme is intended to be a training programme that enables a researcher to work on his/her research independently. University seeks a balance between scholarship and research contribution of a Ph.D. scholar by ensuring that he/she engages in an extensive study in the beginning before embarking on a specific research problem. Our Ph.D. programme has been designed in such a way that any research scholar wishing to pursue further research can choose whether he/she wishes to do it full-time for a minimum of three years or part-time for a minimum of 5 years. A Research Committee in the subject concerned monitors the Ph.D. Programme in each subject. We are happy to report that we have made a provision for an interdisciplinary Ph.D. programme, which is jointly monitored by the Research Committees in the respective subject/s.

In accordance with the guidelines issued by the University Grants commission, New Delhi, the University has introduced the entrance test and students counselling by the Departmental Research Committee for candidates seeking admission to Ph.D. A course work of 9 credit including course on research methodology in each subject is made compulsory for Ph.D. students in each faculty. The research methodology course for basic Sciences, Social Sciences and Humanities is offered at university level common to all the reported Ph.D. students.

#### 3.3 Research Collaborations in Progress

A very important aspect of our research effort is a strong collaborative research programme. The faculties have succeeded in developing collaborative research with academics in India and abroad resulting in the publication of joint research papers, operating collaborative research projects, joint organization of various academic programmes, faculty visits and so on. This is through e-mail facility followed by faculty visits.

### Interdepartmental Collaboration

There is also interdepartmental collaborative research among Departments in Humanities and Social Sciences as well as among some Departments in Sciences. These include research amongst (a) Departments of Chemistry and Biosciences, (b) Departments of Materials Science and Chemistry, (c) Departments of Biosciences and Mathematics, (d) Departments of Mathematics and Chemistry, (e) Departments of Languages, (f) Departments of Computer Science and Technology and Biosciences, (g) Department of Economics and Agro-Economic Research Centre, (h) Departments of Home Science and Biosciences, (i) Departments of Materials Science and Biosciences and (j) Departments of Physics and Materials Science. The Department of Materials Science has also developed collaborations with GCET College, BVM Engineering College, SVNIT, Surat and LD Engineering College. of course, all Departments converge in the activities of the Community Science Centre.

Accepting a concrete outcome like publication of papers, research projects, patents, organization of an academic programme as criteria for research collaboration, the following table describes the research collaborations in progress during the present year:

The following Table offers a bird's eye view of the research collaborations in progress in the year under review:

## CHAPTER- 4

### INFRASTRUCTURE AND LEARNING RESOURCES

---

We have been able to create and utilize good learning resources. Money has never been a constraint, thanks to the generous funding made available by the UGC and the State Government from time to time. We have been able to strengthen our libraries with the latest books in each and every subject-discipline. We have paid heed to the need of computer literacy and the use of computers as a learning resource. Thanks to the UGC and the Government of India initiatives, we have access to a variety of subject-specific journals through INFLIBNET and other sources. Internet connectivity with high bandwidth is available to all teachers in the University as well as to learners and research scholars in our libraries.

#### **4.1 The Uses of Computers as a Learning Resource in the University are Manifold.**

- 1 **Computers and Computing:** We use the computers as office automation tool for data management, data mining, and research. The basic use of computers is being taught in all the departments
- 2 **Internet Connectivity:** The University has provided Internet connectivity to all Postgraduate Departments with sufficient nodes. Postgraduate students and PhD scholars are encouraged to use this facility. Effective use of the Internet for literature search and E-transfer of data is greatly helping students and researchers alike in preparations for seminars, designing research and project proposals, updating and refining their dissertations and theses, and electronically communicating and managing their research papers. Over and above all this, it has become an extraordinary powerful means of establishing and maintaining academic contact and information exchange with other workers and peers, greatly enhancing research effort. In many cases, this had led to joint publications of research papers.
- 3 **Training for freeware:** The University has begun to train students for the effective use of relevant freeware. The use of the technical software Latex is taught to PhD scholars in the University Departments of Mathematics, Statistics, and Physics with a view to equipping them with the necessary skills to be able to prepare technical material.
- 4 **Training in specialized software:** Relevant computer courses with practical training on computers are offered in many departments, besides computer programming course of varying degrees of sophistication. We also include training to the students in effective use of readily available specific software like MATLAB and MATHEMATICA in Mathematics, SPSS in Statistics, SOUL in Library Science etc.
- 5 **Analytical ability:** Teaching of courses like Computers and Statistical methods in the Department of Biosciences, Department of Home Science and Departments of Social Sciences helps learners acquire important analytical ability for experimental studies as well as enable them to use many modern scientific equipment with which computers remain attached effectively in modern times.

- 6 **Software Development:** The Department of Computer Science and Technology trains students in the design and development of software.
- 7 **Computers as teaching aid:** We use computers as an effective teaching aid. We encourage the use of multimedia tools in classroom teaching. A section of the members of faculty in some departments have succeeded in designing software to meet their needs: to prepare their PowerPoint presentation slides; to facilitate classroom teaching; and to keep assignments as well as reading materials on servers so that soft copies can be accessed through workstations. Most departments have software tools required for developing computer-aided teaching-learning materials.

- Printing of External Course Syllabus - S.Y.B.Com. - II - Economics, Printing of S.Y.B.Com.- Fundamentals of Cost and Management Accounting, Production and Marketing Management.

**(2) Upgradation and Computerization Facility:**

As the advent of Computers, we have restricted the old Hand Compose and Letterpress Printing Process, up to certain level. Receipts with numbering and only very small run jobs are executed through letterpress printing. Rest of the jobs have been routed through Computerized Type Setting-DTP work or Designing and Printed with Screen Printing or Offset Printing process according to nature of the job. Multi Colour-Four Colour Offset jobs are designed on computer and then C-t-P (Computer-to-Plate) is taken out and Four Colour Offset Printing is outsourced.

The same way, the isolated Examination Unit of University Press has also been made fully computerized. Question papers are typed/entered and set on Computers, and then after proof reading printed on High-Speed Copy Printer machines.

Thus, adopting computerization the process has become easier and speedy, comparing to manual hand composing.

**(3) SECURITY:**

CCTV System in Examination Unit of University Press has set up highest standard of security, so that secrecy is maintained in every block of Examination Unit i.e. Entry Point, Computer Unit, Printing Unit, Block wise Unit and Proof Reading Hall.

A Security Guard is kept engaged amongst University Press, Bhaikaka Library and Home-science Department. Security is strengthened more, while the numbers of question papers are more, by engaging more security guards. Entry Register is maintained with Entry and Exit time along with initials of Senior Press Supervisors, Proof Readers and Distributors. Employees, who are engaged in examination work, are detained up to the next half hour of examinations starting time; and muster is maintained for the same with Name, Time of Entry and Exit and Signature.

## CHAPTER – 6 ORGANIZATION AND MANAGEMENT

The university has a long-standing tradition of leadership in all walks of academic as well as administrative life. Thanks to the tall academic leaders we have had in the form of Vice Chancellors like Shri Bhailal D. Patel, Shri Babubhai J Patel, Professor R S Mehta, Professor R D Patel, Professor P J Patel, Professor B G Patel, Professor Harish Padh. Professor Shirish R Kulkarni and at present Professor Niranjan Patel, Faculty in the university have remained motivated and have been working towards developing higher standards of achievement. Gujaratis settled abroad or Non-resident Gujaratis, who form a part of the Indian Diaspora, contribute innovative ideas of management and quite often make donations to the university, Rs.21,00,000/- lakh donation received in the year 2022-23. This University is well-known in the world today due at least to two major reasons: the association of the name of the great son of the soil, Shri Sardar Patel, with it; and the contribution of the teaching fraternity in the University.

We are an affiliating university catering to the needs of approximately 50,000 students distributed in 11 faculties in more than 129 affiliated colleges (including departments). The large number of students in the university has indeed posed pressure on the administration due to inadequate staffing in academic and administrative sections. The university leadership has been successful to persuade the state government to issue no objection certificates so that it can fill the vacancies that have remained unfilled for a long time and also new additional positions are sanctioned.

Major statutory academic bodies of the university include Boards of Studies, Faculties, Board of Postgraduate Studies and Research, Academic Council, the Senate, and the Executive Council. Each of these bodies considers proposals, discusses them at length and decides on policy before passing the proposals on to the next higher body. Consequently, quality is perceived and pursued naturally, without wasting time and energy in mere discussion. The official interactions between the administrative and academic units are bilaterally gainful for making the functioning more effective and efficient both ways in quite an amicable manner. Administrative sections and their intersectional communications make the whole system goal-oriented.

## 6.2 University Finance

The operating budget of the institutions is adequate to cover their day-to-day expenditure. Notwithstanding the fact that the State Government sometimes fails in releasing the adequate monthly grant in time, which creates pressure on the fiscal resources of the University. The pressure is eased using the funds available from the self-financing programmes and courses. The maintenance budget of the University is insufficient with reference to its assets, mainly because the Government, though based on value estimated three years ago, provides only 3% of the book value of the assets. The University accounts have been audited regularly, and a mechanism has been established for internal as well as external audit.

Three initiatives have been undertaken to ensure proper financial management in the University.

(1) The University appointed a High-Powered Committee in 2003-04 to till date coordinate and streamline the financial aspects of the Postgraduate Departments as well as the Administrative Unit, and its recommendations have been implemented. (2) An Internal Auditor, who is a qualified chartered accountant, audits and approves each bill prior to payments being made, and then puts up the monthly report before competent authorities of the University. (3) The Executive Council has also appointed a Financial Advisory Committee for overseeing fiscal management and providing guidelines to ensure that the financial health of the University is maintained.

### SYSTEMS OF ACCOUNTS

1. Maintenance Accounts (Non-Plan), dealing with revenue receipts and expenditure of the university.
2. Development Account (UGC Plan), dealing with the development of the university. The expenditure is being met out of the five-year plan.
3. Earmarked (Specific) and Endowment Funds, dealing with the transactions in connection with the earmarked research projects and awarding scholarships and medals. Conferences and other specified purposes are funded by various agencies namely UGC, DST, DAE, CSIR, NBHM, DRDL, ICAR, NDDDB, State Governments etc.
4. Self Financed Courses: Separate accounts are maintained and expenses are being met from the resources.
5. Debt, Funds and Deposits relate to the receipts and payments in connection with the Provident Fund and other various receipts.

## CHAPTER-7 HEALTHY/INNOVATIVE PRACTICES

---

NAAC used the phrase 'Best Practices' for a long time before shifting to the alternatives 'Healthy Practices' and 'Innovative Practices'. All these terms may be synonymous but as it happens with synonyms wherein words share something in common but differ in great degree in meaning, these terms also differ. The term *best practice* is certainly a reference to performance vis-à-vis activities indicative of a habit aimed at improvement of a skill or skills set. The term *healthy practice* signals a practice that has, shows, or promotes positivity in the overall performance. Healthy practice is one which indicates that the activity or a set of activities provide us evidence of the institution being in good health. The term *innovative practice* indicates activity or a set of activities being performed indicate uniqueness, or suggestive of these set of activities being matchless and, therefore, superior in nature.

Some of the healthy/innovative practices we have been able to put in place and follow very meticulously as a continuum are as follows:

1. The University township in general and the University campus in particular abounds in trees of all kinds and this has helped reduce pollution a great deal and maintain temperatures at 2 to 3 % lower than what these actually are outside the campus and township especially in hot summer. This also adds to the ambience of the place.
2. The Vallabh Vidyanagar Municipal Borough and the University ensures that new trees are planted in place of those that may have dried up. There is a near complete ban imposed on felling of trees on the campus and in the township. This practice ensured the presence of highest density of trees per km in Gujarat.
3. Our Internal Quality Assurance Cell (IQAC), which was created in the year 2000 to work on the SSR for the assessment and accreditation for the first time in December that year, was formalised in 2004. Subsequently, it was reconstituted in 2006, 2009 and 2015 to start preparing the SSR for reaccreditation. It has worked in tandem with the Examination Reforms Unit (ERU) of the University. These two units have kept a watchful eye on and addressed the academic and examination related issues from time to time.
4. Our successive Vice Chancellors have made themselves accessible and available to the student community throughout the year, depending on the nature of their daily schedule.
5. Admission Process for U.G. & P.G. is centralised and it is done online. Student can fill his/her central admission form anywhere through University portal. Admission is allotted based on his/her merit & Admission is issued to the student based on the student's choice. He/She can select College/Department & get the admission. The admission process is student friendly & transparent.

There is complete transparency in admissions granted on the basis of merit as the merit list for the masters, MPhil and PhD programmes is prepared and put on the University website. The university has adhered to the national and state reservation policies in granting of admissions. Students from communities belonging to Schedule Castes, Schedule Tribes, Socially and Economically Backward Classes, Physically or Visually Challenged groups, children of retired army men and women etc are admitted on merit against their reserved quota and, therefore, there have been no complaints of discrimination. The M.Phil and Ph.D. Entrance Test are conducted centrally.

6. The university departments work in close cooperation with each other and this ensures work getting done quickly. Everyone in the university departments knows everyone else in the

- administration, and this has facilitated a happy co-existence. Interdisciplinary and multidisciplinary teaching and researches are encouraged and are in practice.
7. The university takes pride in the fact that we have never had strikes on the campus and no ragging. Academic sessions begin every year on time, examinations are announced and conducted on time, and central evaluation is conducted and results declared on time. Complete confidentiality is observed in on-the-spot evaluation and resolution of the problem/s.
  8. 10% of the meritorious students admitted on self-financing basis are granted 50% free ship on the basis of their merit standing at the Bachelors for those in the first year of the two-year master's programme and during the second year on the basis of their performance in the examination in the first year of masters' programme. This works as a great incentive, and motivates our students to compete so as to be eligible for the 50% freeship.
  9. Students receiving gold medals for their outstanding performance in their final year exams are invited a day before the annual convocation, publicly felicitated in the presence of their parents, the teaching fraternity, administrative staff, and leading citizens of the township specially invited for the purpose, and this ends with a dinner engagement where they get to interact with everyone present.
  10. The university disburses gratuity and leave encashment fully by cheque to its superannuating employees on the day of their retirement.
  11. Employees retiring during any given academic year are publicly felicitated and given a warm farewell as a result of which a permanent bond gets at once established between the university and the retiring employees, creating a lot of goodwill.
  12. Medical facilities available in the University Health Centre continue to be extended to the superannuating employees and their families.
  13. The University has been implementing the earn while learn programme to the students.

#### **Details of other Support systems:**

##### **7.1 Internal Quality Assurance Cell (IQAC)**

Internal Quality Assurance Cell was formally established in May 2004 after the first accreditation of our university. In keeping with our policy of paying greater attention to quality aspects to make Quality Consciousness an intrinsic part of the academic and administrative fabric in the University, we set up an IQAC. Its twin objectives are: (a) to ensure continuous improvement in the entire operation of the institution; and (b) to assure the stakeholders in higher education – namely, students, parents, teachers, staff, would-be employers, funding agencies and society in general of the accountability of the institution for its own quality and probity. It functions under the guidance of a Quality Advisory Committee (QAC) chaired by the Vice Chancellor.

The IQAC is mandated to perform the following functions: (1) to develop and apply quality benchmarks/parameters to various activities of the institution; (2) to disseminate information on quality aspects; (3) to organize discussions, workshops, seminars and promote quality circles; (4) to record and monitor quality measures of the institution; (5) to act as a nodal agency of the institution for quality related activities; (6) To collect, analysis and act upon the feedback of the stake holders, chiefly the students and (7) to prepare the Annual Quality Assurance Report and such other reports as may be required from time to time.

### **Objectives of IQAC**

- 1 To ensure timely, efficient and progressive performance of academic, administrative and financial tasks
- 2 To enhance the quality of academic and research programmes by making them relevant
- 3 To create mechanisms so as to ensure equitable access to and affordability of academic programmes for various sections of society
- 4 To optimize and integrate modern methods of teaching and learning into the existing designs of the programme on offer
- 5 To create mechanisms for the improving the credibility of evaluation procedures
- 6 To ensure adequacy, maintenance and functioning of the support structure and services
- 7 To engage in sharing research and networking with other institutions in India and abroad.
- 8 To integrate various activities of the institution.
- 9 To channelize the interdisciplinary work by facilitating faculty members.

### **Composition of IQAC**

The full-fledged IQAC of the University reconstituted on 16/05/2022 has representatives of major stakeholders: We have statutorily-appointed authorities and members of statutory bodies like the Senate, Syndicate, Board of Postgraduate Studies and Research, Academic Council, various Faculties, and various Boards of Studies. The Advisory Committee has due representation of women too.

#### **IQAC Committee**

The IQAC has Coordinator and Co-coordinators with equal share of responsibilities. The coordinator is tasked with the responsibility for effective functioning of the cell and involvement of all its members in this task. The University has evolved a system whereby a great deal of continuity is maintained and those responsible for the activities of the cell are adequately experienced for the purpose.

**65<sup>th</sup> Annual Convocation**  
Thursday, 15<sup>th</sup> December 2022  
**CONVOCATION ADDRESS**

Chief Guest

**Dr. Bimal N. Patel**

Vice-Chancellor, Rashtriya Raksha University  
Member, National Security Advisory Board of India  
Member-Designate, United Nations International Law Commission

---

Shri Acharya Devrath, Hon'ble Governor of Gujarat and Chancellor of the Sardar Patel University; Shri Niranjan Patel, Hon'ble Vice Chancellor of the Sardar Patel University; Shri Bhailalbhai Patel, Registrar, Vice Chancellors and Registrar of other Universities of Gujarat; members of Board of Management and Academic Council; Deans of various faculties, heads of departments, learned faculty members, distinguished guests, dear students, parents, representatives of the press and media, ladies and gentlemen,

What a joyous and honorable momentum when a fourth generation son of soil rises to pay tribute to the great son of this nation – Sardar Vallabhbhai Patel in form of addressing the Convocation for the University which is implementing the values and ideals as we celebrate the 65<sup>th</sup> Convocation Day !!!

Faculty, staff, hundreds and thousands of philanthropes and well-wishers of this **Great Center of Learning** and most importantly graduating students have gathered today to celebrate their academic journey and dreaming high for the professional journey ahead, **I can feel the vibes, the aspirations, the dreams**, but also determination, commitment not forgetting the cynicism which often is required to critically appreciate every development taking place around us.

As I speak to you, your mind may be going back to the days you spent on this campus as a student or researcher. To be an alumnus of Sardar Patel University remains a distinct privilege. The hard working & caring faculty from 116 affiliated colleges, 1 constituent college, 27 departments, who constitute the fulcrum of knowledge-giver and very importantly the staff – the administrative, the finance, the exam staff, may have inspired you directly and indirectly on every single day, making them proud mentors to you as your bright destiny awaits you and you seek blessings from all of them today to reward them through the very motto of this university – **Sheel Vritta Falam Shrutam** (Character and conduct are the fruits of learning). The University has attained multifaceted growth both in size and scope since its establishment in 1955 and is **THE VAT VRIKSHA** of Learning of Science, Philosophy, Humanities, Engineering just to name a few, what an illustrious history...we all bow down with humility to this sustained growth and success of this original envisaged residential rural university. The University and its several departments maintain the leadership role in diverse sectors cutting across regions, nations, and subject lines. May this University grow from strength to strength and let the nation and humanity benefit from the commitment and skills of its students that graduate from here.

Friends, I belong to the village called Khadol, 15 kms away from where we are and originally chose agriculture studies like any one would be wondering why I chose a particular field of study. In my case, what I recall the great importance given by Shri Sardar Vallabhbhai Patel, the farmers turn earth and manure into gold and has right to walk with great pride on this earth. But friends the life is full of surprises and miracles, at times, our first educational degree may be different than what we become however, ethos of any education remain the same – pursuit of knowledge to seek truth and use formal education in whichever field to realize this aim. In my case, I shifted from agriculture science to international law over a period of time and has been able to practice as a teacher, jurist, adviser and administration all aspects of international law, at local, national and global level, over the last three decades. I am able to pursue the passion of learning in international field with same qualities inculcated by my great teachers of then Agriculture University and I believe each of you will be doing the same whether you will continue with the same field of education or change over a period of time.

I call upon you to **enter into professional arena with a confidence, a power, and an idealism that are unimaginable to anyone.** This would be a right tribute to the great leader Shri Patel who united and integrated what we are very proud to call **Akhand Bharat.**

**Real learning** starts from today onwards. Till today, you have mostly learnt from your teachers but from now on, it would be your life and profession which should be making you learn, hence, keep learning with the same sincerity and hard-work which you have been doing and have stayed committed to till today. The great alumni of this University are synonymous with these qualities and you will join this list of glorious achievers. Till this day you have learned in order to earn an academic degree meritoriously, however from now on, learning for you would happen in order to successfully **pass the exams of life and profession**, therefore it is very important for you to remain open to new forms of knowledge, and to keep honing your skills. I call upon you to keep learning, as changes are happening most instantly. **I encourage you to have belief in your ideas and yourselves.** Remember, hard work beats talent when talent doesn't work hard. Friends, it is therefore very important for you to understand and acknowledge what George Herman has to say that “You just can't beat the person who won't give up.” **Therefore, never be afraid or worried about others competition with you, rather be their competition.**

## **2047 India**

The 2047 India would have unbelievable achievements in all walks of life – education, industry, health care, agriculture, services, legal and regulatory.

### **Economic prowess and security**

26,000 USD or nearly 22 lakh Rs or 13 times the existing per capita income is possible by 2047 – who would do this, we all and especially our youth whose demographic dividend will make this happen. This is one of the five utmost pledges which we can take as our Hon'ble Prime Minister appealed to make India an advanced developed nation by 2047. India's growth story like the growth story of this University is attracting the attention of the whole globe. India of 2047 will be having in the world the largest working-age population and that will make this economic prosperity possible. But let's be cautious economic success will ride with social fault-lines and the journals like of *Prajna* and faculty of social sciences, social work and national social service programs will be challenged to find solutions based on excellent research and dissemination. I am sure the faculty of these knowledge sectors are and will be preparing themselves for the newer challenges. Our economic prowess and security will be second to none and therefore we shall start studying challenges to our economic and financial security from now onwards – whether in the field of manufacturing, agriculture, service sectors. The *Arth Vikas* journal of the S. P. University may become one of the most sought-after scholarly journals for policy-makers, thinkers, economists, financial advisers, NITI Aayog, Finance Commission, scholars, in their search for solutions and dealing with evolving economic and financial developments. Economic and financial security will have its own share of legal challenges – whether money laundering, economic offenses, transnational organized economic crimes and therefore inter-disciplinary approach to law and economics is essential. This is what the Gujarat National Law University started and I can see there is potential for collaboration between faculty of economics and finance and law. We will advance with greater conviction and the determination of a developed India – this is the first **Pran** or Pledge announced by the Prime Minister.

### **Get rid of any signs of slavery**

Sardar Patel said and I repeat, “We should remove the dirt of slavery that pervades around us. If the stink of slavery persists even after gaining freedom, the fragrance of freedom would not pervade.” Grime of slavery in many fields, even after 75 years of independence, be law, judicial, academics, bureaucracy or institutions of governance are persisting. In the field of academics, we more than often quote and requote a particular or one can say Western literature, without questioning the relevance, context and utility for India and countries situated similarly. Coming from the legal field, at times one feels inundated and suffocated with quotes of Lords. Those Lords who may have been at the helms of the institutions and norms of permitting and justifying slavery or slavery-like situations, are revered by modern judicial authorities of the country, the time has come to ensure that within next two decades, we would have come out of this garb. In institutions of bureaucracy and law enforcement, I am sure each of one us can count at least double-digit if not triple-digit experiences of how much the culture of slavery has been inflicted upon ordinary Indians especially rural and semi-urban people. Consciousness and alertness in each of our thought, deed and conduct is required to fully eliminate any form or content of the legacy of slavery – the **second Pran**. For **Atmanirbhar** and

**Atmarakshit Bharat**, this is the most essential attribute every Indian must be possessing.

While elimination or cleansing process shall continue, we can celebrate the glorious aspects of our ancient civilization and history – the **third Pran**. Coming from international legal fraternity, while writing a chapter on History of International Law in India and preparing volumes on international law and India, I became so much scholarly enriched with the norms, institutions and practices of law which were prevailing and enabling peaceful co-existence, prosperity and security for people living in this vast land and maritime encompassing the civilization called Bharat. In fact, the **Vasudhev Kutumbkam** which has kept this great nation unified among all diversities and challenges, is also the overarching goals of international law. No surprise as India hosts G20 Presidency, it has most thoughtfully chosen the One Life, One Earth and One People Mantra, as the world is seeking healing and harmony from the wounds of war and pandemic.

The power of unity is the **fourth Pran** and intrinsically linked with the goal of **Vasudhev Kutumbkam**. Unified and collective response to any internal or external challenge for a country or a community or a family is essential. In unity lies the strength and long-term success. Great Sardar Patel had to say “Take to the path of dharma – the path of truth and justice. Don’t misuse your valour. **Remain united**. March forward in all humility, but fully awake to the situation you face, demanding your rights and firmness.” To achieve the goal of a developed India, every citizen needs to be united and that unity will be further required to sustain the developed India. It is the **united India structure, not the only motives, will determine long-term stability and prosperity**. Rights must be based on common strength and not upon the individual strength, of all Indians upon whose performance peace and prosperity will depend.

Can and will the above lofty Prans be achieved and sustained? Certainly, yes but only when we become conscious of our duties first ethos and values. Fundamental rights, human rights, citizen rights, have completely overpowered and even eliminated a sense of duties towards the humanity, the nation, the society, the neighbourhood, the family, the friends. We have become ultrasensitive for our rights but very insensitive to our duties. Rights and duties are two sides of the same coin and thus, the fifth **Pran** is to render duties first.

**\*Service to society and creation of a kind of society where you yourself would want to live**

My mother always says, never forget your duty and conduct and I take this opportunity to recite the same and tell many mothers and fathers here that your daughters and sons are the one who will always uphold the duty and conduct in their professional and personal lives.

India is making a success story – our tradition, our culture and our people on social and culture front and our industrialists, our medium and small-scale industries seeing booming opportunities – all leading to a vibrant democracy and aspiring economic prowess, where we all come together and work towards making India a major player in the political, economic, trade, technology, science, engineering field. **2047, by when majority of those in 20s will be at the peak of career, will see India the second largest economy in the world, our science and technology achievements, thanks to you and millions of others, would have been finding solutions of issues and challenges.** India would become a world power based on civilizational values, vibrant democracy, economic, military, science and technology prowess. You are actually the founders and framers of this India. Very few countries, if at all, would have such amazing history as India. I invoke your conscience, your persistence and perseverance to be part of the **Shresth Bharat**.

In view of the Prime Minister's **Aatmanirbhar Bharat**, many of graduating today might even find yourself in a foreign country in the times to come where you might be living the time of their lives while becoming successful in your respective professions. Friends, while I hope that most of you indeed become successful, it is however also important for you to know that for the country's future progress it is the duty of each of its citizen to help the country benefit in every possible manner. My message here to all of you planning your career abroad at any stage of your professional life would be to definitely plough back in the country and help establish what is otherwise unavailable or underdeveloped for ensuring that others would have better times than just struggle as much as you did.

Believe in the phrase "Ask not what the country can do for you, but what you could do for the country" is very important.

Let this University graduates be known for their instrumental contribution in transforming the nation in the years to come and let them be proud and happy to see that we have created the most conducive society for the growth and development of ourselves and future generations.

**\*Be kind and have faith in yourself – no substitute to hard-work**

**14 Peaks: Nothing is Impossible** – Nimsdai Purja. “Don’t be afraid to dream big,” says iconic Nepali mountaineer Nirmal “Nims” Purja when he climbed all 14 highest mountain peaks each above 8000 meters height in a record time of 6 months and 6 days. Nimsdai Purja achieved this unthinkable feat. Neither financial hardships, nor mother’s illness, nor any other hardship was unsurmountable for him. Friends, this is a real story

only 3 years old, if he can do it in the field of mountaineering, you too can do in your field with passion and a dream. Like the University grew amidst all the challenges and dreamed to be one of the topmost institutions, each of you can and should dream to be on the top in your field. Being resolute that I can do it shall become your mantra as you step out from the halls of this University.

On a different scale and different field, when India nominated me as a candidate for the United Nations International Law Commission, I placed my dream to Hon'ble External Affairs Minister and Hon'ble Foreign Secretary to secure the votes of all countries. Interacting intensively from a small village called Lavad, near Gandhinagar – Dehgam, with 193 members states, thanks to the faith and support of the Hon'ble Prime Minister, Hon'ble External Affairs Ministry, entire foreign ministry, I secured 163 votes, the highest in 75 years of history for India. Friends, I do come from a very humble background too and from a village Khadol, but we wanted to garner the highest votes and then you work and you achieve it and then you celebrate it.

Ask for tough choices and hard-work, I sought blessings of the Hon'ble PM to work 10 times harder than I am working so I can more meaningfully deal with the mounting challenges.

We may be worrying about failures because we always want to win but let's be aware that many of us sitting here have embraced failure once, twice but many times and yet every time we find new directions for us to employ our abilities for a better purpose. Let us see failure as yet another opportunity to work harder towards our goals. When you think of failing, think of great enterpreneuers just within 34 km of this University jurisdiction, who contributed by variety of means to the growth of this University and remain torch-bearers to us all as much as then and now as well. It was their vision, courage and conviction that the University has been making strides year after year.

Try to understand from all these examples that I am citing in front of you a lesson for life, "It always seems impossible until it's done" – Nelson Mandela.

Many of you will be thinking what is next, in case you are yet to be employed. To make things worse, politicians and people with vested interests will magnify unemployment rate and ratio for various purposes. Let's beware that companies, organizations, firms can absorb or give chance to limited number of fresh graduates. No company in the world is going to announce that I will take the entire batch of 160 engineers from a particular university and give them a job which fits with their skills and knowledge and that too with good salary. It is utopia or day-dreaming. No company has done in the history and no company will make such history. But you can make history for yourself, by learning and upskilling how your profile can fit into the requirements of many companies and organizations and if you are modest in remuneration in the initial-phase, please be reassured many employers will be looking for you. Many of us get carried away by reading newspaper announcement about other people getting packages worth lakhs or crores. As the Head of the Gujarat National Law University for nearly 11 years, year after year, I was facing this dilemma from my students. I earnestly request the University authorities and officers to refrain from getting trapped into these fat-salary package

announcements and mad-race. It is certainly nice to hear but it is far from reality because only few and very few can have such supersonic immediate results.

Many of us in view of a good incentive in the form of salary forget about the development of our ideas and innovations, as a matter-of-fact money might take over the way we interpret and look at things. **Continuous personal growth is important.** We want to measure everything and that too in quantifiable terms. We measure our success in exam, if we score very high. We measure our success, if we score good profit. We measure our success of body, if we have particular height, weight and muscular size. These are certainly important but let's see how much time I am able to spend with friends, families and near and dear ones, how much I have learnt both formally and informally, what would be the future of my children, how much I have given back to my parents, family, villages or cities or communities and of course the nation, how much respect and admiration I earn from my environment, how much I have thanked the peons, the chai-walas, the stationary shops, the gardeners, the house-keepers, the security guards. These are important measures which keep our physical and moral profile vital. I am sure these might be little too difficult to digest at this very hour but over a period of time, these will be most useful.

This beautiful campus and campuses of all colleges and institutions of the University have given us so much – the greenery, the cleanliness, the fresh air and as we celebrate the 65<sup>th</sup> convocation, I am reminded Sardar Patel's emphasis on keeping paykhana cleaner than the divankhana (washrooms are cleaner than drawing rooms). On behalf of us all, let's thank each and every housekeeper and care-taker for maintaining and caring for the cleanliness of the campus.

We all are here thanks to the visionary leadership and contribution of the founding fathers. Shri Bhaikaka with the guidance of Shri Sardar Patel dreamt and laid the foundation of this University so the people in and around this immediate area could have affordable education, employment and health care. Each of the 16 Vice-Chancellors, starting from Shri Bhaikaka to Shri Niranjan Patel, have made contribution to the success story of the University and each of the Registrar, including Shri Bhailalbhai Patel, has contributed to the effective and efficient administration of the University and each head of the department, each principal of the college from day one till today, have aimed to live up to the expectations and dreams of the founding fathers. This is an opportunity for us all to express our deep gratitude to them for their contribution to our academic journey.

**Faith and strength, both are essential to accomplish any great work.** I am sure each of the graduating student today have both and will accomplish great work they have been dreaming from the day they joined this great university.

Thank you and all the best wishes and prayers for successful personal and professional life from me, my wife and my two sons.
