

SARDAR PATEL UNIVERSITY
(Bachelor of Science) (Undergraduate) (Industrial Chemistry)
B. Sc. (UG) Semester – I (Effective from JUNE 2023)

Course Code (Major)	US1MAICH01	Title of the Course	Industrial Aspects of Chemistry
Total Credits of the Course	4	Hours per Week	4
Course Objectives:	To make students familiar with: 1. Industrial Aspects of Chemistry as a subject. 2. Basic concepts related to Measurements, inorganic and analytical chemistry.		

Course Content		
Unit	Description	Weightage*(%)
1.	BASIC CONCEPT Matter, elements, compounds, atoms, molecules, molecular formula, mole concept, Avogadro's number, gram-atomic weight, gram molecular weight, equivalent weight, STP, Avogadro's hypothesis and its application, derivation of general gas equation $PV=nRT$, Dalton's law of partial pressure.	25%
2.	ATOMIC STRUCTURE Brief introduction to Bohr's model and its limitation, Concept of shells and subshells Shape of orbital, electron configuration of elements using Auf-bau principle, Hund's rule and Pauli's exclusion principle. MODERN PERIODIC TABLE Brief introduction to Mendeleev's periodic table and its drawback, Classification of element on the basis of their electronic configuration, periodic trend of ionization energy, electron affinity and electron negativity of elements in periodic table.	25%
3.	CONCEPT OF MEASUREMENT AND ACCURACY Principle, construction and working of temperature measuring instruments. Direct and indirect method of level measurement, Sp. Gravity scales, Density and sp. Gravity measurement, Viscosity measurement.	25%
4.	TITRIMETRIC METHODS OF CHEMICAL ANALYSIS General principle of titrimetry, Types of reactions in titrimetry, Standard solution, Basic requirements of titrimetry, Equivalence point and end point, Aqueous Acid Base Titrations, Concept of acid base titration & indicators.	25%

Teaching-Learning	Conventional method (classroom blackboard teaching), ICT. Courses for B. Sc. Industrial Chemistry program are delivered through classroom, engaging, and
-------------------	---

Methodology	inclusive manner that accommodates a variety of learning styles and tools (PowerPoint presentations, audio visual resources, e-resources, seminars, workshops, models).	
Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	Internal Written / Practical Examination (As per CBCS R.6.8.3)	15%
2.	Internal Continuous Assessment in the form of Practical, Viva-voce, Quizzes, Seminars, Assignments, Attendance (As per CBCS R.6.8.3)	15%
3.	University Examination	70%

Course Outcomes: Having completed this course, the learner will be able to	
1.	Acquire knowledge of different basic terms included in chemistry like atomic structure, periodic properties, chemical bonding, equilibrium and water hardness treatment etc.
2.	Relate the formula of mass, moles, atoms, molecules & different way of expressing concentration of the solution & their preparation.
3.	The students will learn the concepts of measurements and analytical aspects.
4.	Know about use of various theoretical analytical methods and their applications.

SARDAR PATEL UNIVERSITY
 (Bachelor of Science) (Undergraduate) (Industrial Chemistry)
 B. Sc. (UG) Semester – I (Effective from JUNE 2023)

Course Code (Major Practical)	US1MAICH02	Title of the Course	Practical (Major)
Total Credits of the Course	04	Hours per Week	08

Course Objectives:	Develop the skill to analyze and identify the chemicals, Develop skills in the scientific method of calibrating the glassware. Enhance the skill of preparation and standardization of analytical solutions. Develop skills in understanding, planning and performing experiments for titrimetric analysis.
--------------------	---

Course Content	
<p>Part: I (02 Credit ; 04 Hours per week)</p> <ul style="list-style-type: none"> ➤ Calibration of Volumetric Glassware. ➤ Preparation & Standardization of Analytical Solutions (Modes of Concentration) ➤ Volumetric Analysis (Acid – Base titrations). ➤ Measurement of pH ➤ Measurement of Specific Gravity. ➤ Measurement of Viscosity. <p>Part: II (02 Credit ; 04 Hours per week)</p> <ul style="list-style-type: none"> ➤ Organic qualitative analysis: (Mono functional) ➤ Purification and Melting point & Boiling Point concept 	

Teaching-Learning Methodology	Courses for B. Sc. Industrial Chemistry program are delivered through classroom, laboratory work in a challenging, engaging, and inclusive manner that accommodates a variety of learning styles and tools (PowerPoint presentations, audio visual resources, e-resources, seminars, workshops, models).
-------------------------------	--

Evaluation Pattern		
Sr. No.	Details of the Evaluation	Weightage
1.	University Examination	100%

Course Outcomes: Having completed this course, the learner will be able to

Acquire practical knowledge of basic chemical laboratory tools and analytical concept for the subject of industrial chemistry.
