<b>Course Code</b>	<b>US03MAPHY03</b>	<b>Title of the Course</b>	<b>Physics Practical</b>
<b>Total Credits of the Course</b>	<b>04</b>	<b>Hours per Week</b>	<b>08</b>

<b>Course Objectives</b>	The course aims at developing the following abilities in the learner: 1. acquire knowledge and develop understanding of concepts, fundamental laws, principles and processes in the area of physics so that relationship between cause and effects of physical phenomenon can be understood; 2. Experimental skills (like taking observations, manipulation of equipment) and communicative skills such as reporting of observations and experimental result. 3. problems solving ability, e.g., analyzing a situation or data and ensure the justification of results. 4. Scientific temper of mind by making judgment on verified facts and not opinions, by showing willingness to accept new ideas and discoveries.
--------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Course Content</b>	
<b>Description</b>	<b>Weightage* (%)</b>
<b>Section A</b> 1. Determination of 'g' by Kater's pendulum (fixed distance) 2. 'Y' by Koonig's method 3. Cardinal points of two lens system 4. Dispersive curve and power of a prism 5. Resolving power of a telescope 6. Determination of wavelength of monochromatic light using Biprism 7. Velocity of sound by resonance tube 8. Determination of unknown wavelength of spectra using Hartmann's formula 9. Determination of specific rotation of optically active substance using Laurent's half shade Polari meter 10. Numerical differentiation	<b>50%</b>
<b>Section B</b> 1. Load line and determination of Q-point for BJT 2. Frequency response of a RC coupled amplifier (without feedback) 3. Study of transformer parameters 4. Variation of $I_c$ and $V_{ce}$ with temperature for Fixed bias/Potential divider Circuit 5. Impedance by voltage drop method 6. Inductance L by Maxwell's bridge 7. Study of L-C-R series resonance circuit 8. RC Phase shift oscillator 9. Planck's constant 'h' using photocell 10. Exponential least square fitting	<b>50%</b>

## SARDAR PATEL UNIVERSITY

Vallabh Vidyanagar, Gujarat

Re-accredited with 'A' Grade by NAAC (CGPA 3.11)

Syllabus with effect from the Academic Year 2024-2025

### Note:

- [1] To provide flexibility, up to the maximum of **20%** of total experiments can be replaced/added by college to this list prepared by the Board of Studies.
- [2] A minimum of **80%** experiments must be performed in practical course.
- [3] To maintain uniformity in assessment of practical examination the below mentioned marks distribution pattern is followed:

Sr. No.	Work done	Weightage as per 100 Marks
1.	Writing Principle / Statement/ Formula with explanation of symbols and units	16 Marks
2.	Diagram/Circuit Diagram / Expected Graph	16 Marks
3.	Setting up of the experiment + Tabular Columns + taking readings	28 Marks
4.	Calculations (explicitly shown) + Graph	20 Marks
5.	Accuracy of results with units	08 Marks
6.	Round the year Performance/ Records (to be valued at the time of practical Examination through oral viva)	12 Marks
		<b>100 Marks</b>

### Note:

- Weightage of both the sections A and B are 50%. Students are required to obtain 40% of total marks.
- Wherever explicit setting up of experiments does not exist like in the case of spectral charts or pre-acquired data is involved, the marks for setting up of experiment may be provided for additional graphs and formulae.

**SARDAR PATEL UNIVERSITY**

Vallabh Vidyanagar, Gujarat

Re-accredited with 'A' Grade by NAAC (CGPA 3.11)

Syllabus with effect from the Academic Year 2024-2025

**Bachelor of Science****B.Sc. Physics (Semester- III)**

<b>Course Code</b>	<b>US03IDPHY02</b>	<b>Title of the Course</b>	<b>Physics Practical</b>
<b>Total Credits of the Course</b>	<b>02</b>	<b>Hours per Week</b>	<b>04</b>

<b>Course Objectives</b>	<p>The course aims at developing the following abilities in the learner:</p> <ol style="list-style-type: none"> <li>1. acquire knowledge and develop understanding of concepts, fundamental laws, principles and processes in the area of physics so that relationship between cause and effects of physical phenomenon can be understood;</li> <li>2. Experimental skills (like taking observations, manipulation of equipment) and communicative skills such as reporting of observations and experimental result. The problems solving ability, e.g., analyzing a situation or data and ensure the justification of results.</li> <li>3. Scientific temper of mind by making judgment on verified facts and not opinions, by showing willingness to accept new ideas and discoveries.</li> </ol>
--------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Course Content</b>	
<b>Description</b>	<b>Weightage* (%)</b>
<ol style="list-style-type: none"> <li>1. Determination of 'g' by Kater's pendulum (fixed distance)</li> <li>2. Dispersive curve and power of a prism</li> <li>3. Resolving power of a telescope</li> <li>4. Velocity of sound by resonance tube</li> <li>5. Determination of unknown wavelength of spectra using Hartmann's formula</li> <li>6. Numerical differentiation</li> <li>7. Study of transformer parameters</li> <li>8. Inductance L by Maxwell's bridge</li> <li>9. Study of L-C-R series/parallel resonance circuit</li> <li>10. Planck's constant 'h' using photocell</li> <li>11. Exponential least square fitting</li> </ol>	<b>100%</b>

**Note:** [1] To provide flexibility, up to the maximum of 20% of total experiments can be replaced/ added by college to this list prepared by the Board of Studies.

[2] A minimum of 80% experiments must be performed in practical course.

[3] To maintain uniformity in assessment of practical examination the below mentioned marks distribution pattern is followed:

<b>Sr. No.</b>	<b>Work done</b>	<b>Weightage as per 100 Marks</b>
1.	Writing Principle / Statement/ Formula with explanation of symbols and units	08 Marks
2.	Diagram/Circuit Diagram / Expected Graph	08 Marks
3.	Setting up of the experiment + Tabular Columns + taking readings	14 Marks
4.	Calculations (explicitly shown) + Graph	10 Marks
5.	Accuracy of results with units	04 Marks
6.	Round the year Performance/ Records (to be valued at the time of practical Examination through oral viva)	06 Marks
		<b>50 Marks</b>

**SARDAR PATEL UNIVERSITY**

Vallabh Vidyanagar, Gujarat

Re-accredited with 'A' Grade by NAAC (CGPA 3.11)

Syllabus with effect from the Academic Year 2024-2025

**Note:**

- Wherever explicit setting up of experiments does not exist like in the case of spectral charts or pre-acquired data is involved, the marks for setting up of experiment may be provided for additional graphs and formulae.

<b>Teaching-Learning Methodology</b>	Direct Teaching through Demonstration, Chalk-Walk and Talk ICT enabled teaching Question-Answer Group discussion led by teacher/students Problem solving activities Collaborative and Co-operative Learning Think Pair Share Jigsaw Inquiry Based Learning Panel Discussion Viva voce Blended Learning designs
--------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Evaluation Pattern</b>		
<b>Sr. No.</b>	<b>Details of the Evaluation</b>	<b>Weightage</b>
1.	Internal Continuous Assessment in the form of Practical Examination, Quizzes, Assignments, Active learning, Viva-voce, Seminars, Attendance (As per NEP Guideline)	50%
2.	University Examination	50%

<b>Course Outcomes:</b> On the successful completion of the course, the students will be able to	
1.	Apply the various procedures and techniques for the experiments.
2.	Use the different measuring devices and meters to record the data with precision
3.	Apply the mathematical concepts/equations to obtain quantitative results
4.	Develop basic communication skills through working in groups in performing the laboratory experiments and by interpreting the results.

<b>Reference Books</b>	
<b>Sr. No.</b>	<b>References</b>
1.	Advanced Practical Physics for students B. L. Worsnop and H. T. Flint, Methuen and Co, Ltd., London.
2.	B. Sc. Practical Physics C. L. Arora, S. Chand & Co. Ltd., New Delhi.
3.	Advanced Practical Physics M. S. Chauhan and S. P. Singh, Pragati Prakashan, Meerut.
4.	Advanced Practical Physics S. L. Gupta and V. Kumar, Pragati Prakashan, Meerut.

Bachelor of Science  
B.Sc. Physics (Semester -III)

Course Code	US03SEPHY01	Title of the Course	Instrumentation and Transducers
Total Credits of the Course	02	Hours per Week	02

Course Objectives	<ol style="list-style-type: none"><li>1. To learn the construction, working principle and applications of Cathode Ray Oscilloscope.</li><li>2. To familiarize and acquaint the students with different types of analog transducers used for measurements of various physical parameters such as pressure at different levels.</li></ol>
-------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Course Content		
Unit	Description	Weightage* (%)
1	<b>CRO and Transducers</b> <b>CRO:</b> Cathode Ray Oscilloscope, Block diagram of CRO, Applications of CRO: Study of waveforms, measurement of voltages, measurement of current, measurement of frequency, measurement of phase difference. <b>Transducers:</b> Analog Transducers: Electromechanical Type Transducer, Potentiometric resistance type, Inductive Type, Capacitive Type transducer. [N N Bhargava, D C Kulshreshtha and S C Gupta: 14.4,14.4.3, 14.4.5 B C Nakra and K K Chaudhary: 4.1, 4.1.1]	50%
2	<b>Transducers and Pressure Measurements</b> <b>Transducers:</b> Resistance Strain Gauges, Unbonded Strain Gauge, Bonded Strain Gauge, Resistance Strain Gauge Bridges, Balanced Bridge. Ionization Transducers, Mechano-Electronic Transducer, Opto-Electrical Transducer, Photo-emissive transducer, Photoconductive Transducer, Photo-voltaic Transducer <b>Pressure Measurements:</b> Introduction, Moderate Pressure Measurements, Manometers, High Pressure Measurements, Low Pressure (Vacuum) Measurements: McLeod Gauge, Thermal conductivity or Pirani Gauge, Ionization Gauge. [B C Nakra and K K Chaudhary: 4.1.1, 4.1.2,4.1.2,11.1,11.1.1, 11.2, 11.3]	50%

Teaching-Learning Methodology	Direct Teaching through Chalk-Walk and Talk, ICT Enabled teaching, Question-Answer Class discussion led by teacher/students Case Studies Literature review Problem solving activities Debate, Collaborative and Co-operative LearningThink

<b>Evaluation Pattern</b>		
<b>Sr. No.</b>	<b>Details of the Evaluation</b>	<b>Weightage</b>
1.	Internal Continuous Assessment in the form of Internal Written Test, Quizzes, Assignments, Active learning, Viva-voce, Seminars, Attendance (As per NEP Guideline)	50%
2.	University Examination	50%

<b>Course Outcomes:</b> After the successful completion of the course, the students will be able to	
1.	Understand the cathode ray oscilloscope for measurements of various quantities of electrical signals like, frequency, phase and amplitude.
2.	Identify and design the required transducers for measurements of various physical parameters like pressure at different level.
